

6516205623.txt

I'm sure alot of what you all do I don't understand or care about, and I'm sure you are necessary and good at what you do - However, there will be mistakes made by people along the way and this is surely a mistake by you. To waste valuable time and energy fighting something like XM radio's ability to provide us with weather and traffic is petty and such a blatant waste of time and infringement on our freedoms. We pay good money for the product and pay a monthly charge for the service and we have ever right to be able to obtain weather and traffic reports. For the love of god I can't believe it was even necessary for me to write this to complain, this shouldn't be an issue. I'm sure you all realize that and please just don't make a useless battle. I'm sure you would find it absurd if all the stores grouped up to try to ban the Home Shopping Network from the cable or satellite providers you pay for in your homes. It's ridiculous and it needs to be stopped. Please REJECT NAB's petition 04-160
